

Everywhere It Matters.™

Performance™ Industrial

GET INDUSTRIAL-STRENGTH CLEAN WITH **Industrial-Strength Science**

Ecolab's Performance™ Industrial Program is formulated with proprietary chemistry to provide excellent cleaning performance on all varieties of industrial soils—effective removal of petroleum, oil, and grease – from the dirtiest coming from the industry to the most delicate such as Corporate uniforms for which appearance, exceptional level of whiteness and comfort are critical.

The Performance™ Industrial Program system is designed with the ever-changing soils of industrial laundries in mind. It allows for high efficiency customized formulas, creating the versatility to manage every application and drive results for your business. Because worker's safety is essential, Performance™ Industrial has been tested and validated by an external Institute* to respect the properties of the different types of protective garments (including high visibility, flame retardant, chemical protection).

Best of all, the Performance™ Industrial Program ensures we are incorporating a sustainable product design in a way that delivers the best customer results while maximizing environmental safety. Ecolab leverages industrial-strength science to meet your sustainable laundry solution needs.

*Performance has been tested and validated by Hohenstein Institute to achieve the highest levels of clean while maintaining the integrity of workwear safety features.

The first dedicated program to match the complexity and diversity of industrial workwear and uniforms

TEXTILE CATEGORY

Automotive and metal industries

- ▲ The best **soil removal** solution on the market
- ▲ Better **color** protection
- ▲ Improves the **comfort** of the wearers
- ▲ Extends **linen life**

Food industries

- ▲ Highest standard of **cleanliness**
- ▲ Protection of the original **whiteness**
- ▲ **Hygiene** guaranteed
- ▲ Extends **linen life**

Corporate uniforms

- ▲ Better **color** protection
- ▲ Extends **linen life**
- ▲ Improves the **comfort** of the wearers

Personal protective Clothing/wear

- ▲ Perfect **cleanliness**
- ▲ **Protects the safety properties** of the garments
- ▲ Extension of the textile **lifetime**
- ▲ **Recommended** by the main PPE suppliers and High-viz stripe producers

TAILOR MADE CHEMISTRY

- ◆ **NEW** proprietary industrial soil removing technology
- ◆ Dedicated specific surfactants for industrial soiling
- ◆ **NEW** chemistry containing special enzymes for food stains.
- ◆ Whiteness protection components
- ◆ Gentle formulas
- ◆ Energy efficient (low temp processes)
- ◆ VAH/RKI application at 55°C
- ◆ Dermatological certification
- ◆ Excellent rinsing properties
- ◆ Statement of innocuousness for all Performance industrial products
