

Aqua Energy System

Water & Energy Saving Solution

Aqua Energy System is a central thermal energy buffer, to collect and redistribute hot water, heated with free, recovered energy.

MAIN FEATURES

- ◆ Hot water buffer system with integrated temperature zones
- ◆ Smart control panel
- ◆ Stainless steel with 5 cm high quality insulation material
- ◆ Fresh water pump bypasses

BENEFITS

- ◆ Continuous temperature control
- ◆ Integrated level sensors
- ◆ Inverter controlled distribution pumps
- ◆ Energy recovery monitor (optional)
- ◆ Extra heating with steam (optional)
- ◆ Extra heating with Aqua Heater Plus T (optional)
- ◆ Visualisation and documentation (together with EOP PLUS) of waste water ph and temp. for authorities with automatic mail info
